

DYNA-MIGHT

Primary Use: Heavy Duty Cleaner/Degreaser

Product Description

DYNA MIGHT is a heavy duty, caustic and solvent based cleaner/degreaser. Great for heavy duty jobs like degreasing engines, fantastic for deck stripping. With its unique blend of emulsifiers, it is truly a DYNA MIGHT formulation.

Directions for Use:

Always test first to adjust strength weaker or stronger as needed. For general cleaning, mix 4 ounces in a 32 ounce spray bottle. For pump spraying mix 2 cups of detergent per gallon of water into pump sprayer. Spray onto surface to be cleaned, scrub with brush then rinse thoroughly. For pressure washing, adjust injector for a 60:1 ratio to start. Adjust as needed. Always start at the bottom of object to be cleaned and working upwards to avoid drying and streaking. Rinse with clean water from top to bottom.
