

VECTOR TORNADO

(USDA AUTHORIZED)

Primary Use: USDA Authorized Heavy Duty Detergent

Product Description Tornado is a very heavy-duty caustic detergent for cleaning hot dip tanks, restaurant cooking areas, vents, meat smoke houses and much more. It is the most aggressive cleaner available from Vector Laboratories. Contains a substantial amount of Sodium Hydroxide and should not be used on polished surfaces or soft metals. Tornado is authorized by the USDA for use in federally inspected food plants. Let the grease be washed away with Tornado.

Directions for Use: Always test first to adjust strength weaker or stronger as needed. For general cleaning, mix 2 to 4 ounces in a 32 ounce spray bottle. Spray onto tables, counters, etc then wipe clean. For pump spraying of shelves, surfaces, etc mix 1 to 2 cups of detergent per gallon of water into pump sprayer. Spray onto surface to be cleaned, scrub with brush then rinse thoroughly. For pressure washing, adjust injector for a 60:1 ratio to start. Adjust as needed. Always start at the bottom of object to be cleaned and working upwards to avoid drying and streaking. Rinse with clean water from top to bottom.
