

SEPTIC TANK & DRAINFIELD ACTIVATOR

Primary Use: Septic Tank Additive

Product Description

Septic Tank & Drainfield Activator contains clinically grown bacteria and enzymes. The bacteria/enzyme combination uses biological action to revitalize waste systems and drains. The **Activator** breaks down organic matter that can clog drains, septic and cesspools systems. The **Activator** is *non-caustic, non-acid, and non-corrosive*.

Directions for Use: Shake well before using

Sluggish Septic Tank: Add one gallon of Septic Tank and Drain Activator to toilet and flush. **New Septic Tank:** Add one gallon of Septic Tank and Drain Activator to toilet and flush. **Normal Septic Tank Use:** Add two cups to toilet and flush. Repeat monthly.

Drains and Pipes: Add 1/3 cup to each drain monthly. Add one cup of warm water with each application. This will clean lines and avoid buildups.

Odor Control: Apply or spray to odor areas. Put 2 ounces in disposal to eliminate odors.
